

This is the guide for Lab 2:

## Objective 1: Network Monitoring | SNMP & Syslog

Here is the config for SNAP and Syslog:

```
snmp-server community NMAS ro
snmp-server host 10.100.0.5 version 2c NMAS
!
logging host 10.100.0.5
!
```

## Objective 2: Network Monitoring | gRPC & NetConf

```
management api gnmi
  transport grpc def
!
management api netconf
  transport ssh def
!
```

Now all devices should have SNMP, Syslog, gRPC and NetConf configured
